DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 1 and 3-10 in Paper No. 7 is acknowledged. The traversal is on the ground(s) that there is no serious burden for the product and process claims to be examined together since they are classified together. This is not found persuasive because pertinent art for one invention would not necessarily be pertinent art for the other invention. This would require the examiner to continue searching the other invention and thus be a serious burden.

The requirement is still deemed proper and is therefore made FINAL.

2. Applicant's election of claims 1 and 3-10 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out an elected species a call was made to Ms Margaret Chappuis on 10/14/03. Ms Chappuis elected the species of claim 1 with traverse.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant fails to explicitly define the ligands X and Y. In particular, claim 4 has no definition of ligands X and Y. Claim 6 reference to ligands X and Y is also confusing and indefinite. For example, applicant states that "Y is a cleavable organic function group as depicted in formula 3". Does this language refer to the entire formula or to the portion of the compound which defines ligand X? Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 3-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson et al (US 3,313,648). Johnson et al disclose the compound of claim 1. See for example column 10 line 66¹. Note claim 3 is still a compound claim. The intended use does not add to the patentability of the compound.

¹ Dimethyldiformoxysilane is the same compound as diformatodimethylsilane. The compound has the following formula:
